invoicing

eINVOICE

A complete invoice processing automation solution

6 reasons for choosing **eINVOICE**

Avoid the hassle and high cost of manual billing processes and start enjoying **the benefits of online invoicing** from day one!

Certify the
authenticity and
integrity of
your invoices

- 1 Cost savings**
Save up to 80% on invoice processing costs by automating the sending and archiving of electronic invoices to your customers.
- 2 Faster payments**
Collect accounts receivables faster and increase your cash-flow by significantly reducing customer invoice processing and delivery time.
- 3 100% tax compliance**
Send customer invoices in full compliance with the Greek Generally Accepted Accounting Principles (GAAP), covering the obligations regarding the authenticity of origin and the integrity of their content.
- 4 24x7 availability**
Store your customer invoices in the Cloud (for 5 years) and easily access them in real-time, with no geographical or time restrictions, using any device.
- 5 Higher productivity**
Reduce the amount of time spent on processing invoices, eliminate handling errors and allow your people to focus in core business activities.
- 6 Better support**
Deliver invoices according to your customers' preference and provide them secure access to the eINVOICE web portal, bringing better customer support and service.

eINVOICE
send
invoices with
just one click!

eINVOICE is an advanced **SoftOne Cloud-based service** that fully automates the sending and archiving of both **electronic** and **paper** customer invoices.

It is a unique business solution that completely frees your company from the costly process of printing, archiving and mailing invoices to your customers.

Traditional invoicing

Get paid
faster

Operating on the **Microsoft Windows Azure** Cloud platform, **eINVOICE** makes invoicing an **easy, automated** and highly **effective** process.

Requiring nothing more than an internet connection, it enables you to send certified invoices to your customers directly from your business software **with a click** of a button!

Reliably and in full compliance with the Greek Generally Accepted Accounting Principles (GAAP).

Save up to **80%**
on invoice processing costs

Automation in every step of the process

eINVOICE is a contemporary **customer invoice processing** automation solution.

It completely simplifies all steps of the process, allowing you to send invoices online and deliver them according to your customers' preference (**electronic** or **paper**).

Sending

As soon as an invoice is issued in your business software, it is transmitted to eINVOICE with a simple click.

Marking

eINVOICE certifies the sent invoice using a unique digital signage so that your business is ensured against any tax authority.

Delivery

eINVOICE delivers an electronic or a paper invoice to the defined recipient, according to its preference.

Management

Both you and your customer can easily audit or even retrieve the invoice -anytime- over the eINVOICE web portal.

Archiving

The sent invoice is automatically archived in the Cloud for a 5-year period since its issuance date.

Features

Utilizing the enhanced capabilities of Cloud computing, eINVOICE improves the efficiency of invoice processing, providing:

- ✓ **Easy integration** with your existing business software or billing application, using only an easy-to-deploy API.
- ✓ **Online invoice delivery with a click** of a button, requiring nothing more than an internet connection.
- ✓ **Utmost security**, ensured through ISO certifications (20000-1:2011, 27001:2005) along with advanced security protocols.
- ✓ **Tax compliance**, guaranteeing the authenticity of origin, the integrity of content and the legibility of your invoices.
- ✓ **Past invoices uploading** for creating a unified electronic record for all sent customer invoices.
- ✓ **Real-time visibility and control** over your accounts receivables by referring to the track record kept for any invoice.
- ✓ **One-to-one marketing tools** for displaying promotional messages to the recipients of your invoices.
- ✓ **Automatic Cloud archiving and 24x7 access** to customer invoices from anywhere, using any browser and device (pc, smartphone, tablet)

...and even more

- ✓ **Printing, stuffing into envelope and mailing paper invoices** to customers that do not wish to receive electronic ones.
- ✓ **Attaching supporting files** (such as leaflets, contracts and shipping documents) to your customer electronic invoices.

SoftOne was established in 2002, focusing strategically in the development of innovative business solutions with emphasis in Cloud deployment. Its key personnel includes outstanding professionals with long term experience in the development of top quality business software and Cloud service.
