# Services

Service One S.A. is a 99% subsidiary of Fournalis Trade S.A. and a member of Fournalis Group, one of the leading group of companies in Greece and the Balkans in providing quality consumer durable goods. The company has developed one of the best-organized field service structures, which is able to provide prompt and effective network-wide support in Electric and Electronic appliances and Home Furnishings.

## Overview

Service One exploited the enhanced cloud and mobility functions of Soft1 Open Enterprise Edition, in order to implement an advanced solution that fully supports the daily operations of its extensive field service network. The company selected Soft1 Cloud ERP running on the secure and reliable Microsoft Windows Azure platform to support the back-office operations, while Soft1 Web360 is used by more than 200 partners nationwide, 20 company-owned mobile units and 50 executive users for carrying through their daily activities. The system allows the central management of these activities and the unification of all field service support processes. The users are capable of directly controlling and committing the company stock, viewing the availability of the manufacturer stock, validating warranties per device and proceeding to service support without any company involvement.

# Services

Hidraulica is a company that operates on the Romanian market since 1998, one of the major companies involved in mobile hydraulic equipment repair and maintenance. Currently, they have over 3,000 customers, covering all needs related to hydro-pneumatic actuators and trying to offer best quality products and services.

## Overview

Hidraulica needed, under the pressure of time, a complete ERP solution, to ensure an efficient accounting activity for their sold production. For the purpose of efficiency, Soft1 ERP has an impressive speed of processing and displaying data: management, costs center, account, quantitative and value reports for each department. With Soft1, users are able to work from home or from anywhere (client / server) without the need to purchase a VPN, due to incorporated advanced technologies for data security. Also, the two branches (Sacele, Otopeni), together with the outsourced accounting department, totaling over 30 workstations, efficiently connects remote to a common database. Implementing Soft1 ERP increased efficiency in developing business processes and also reduced time for recording commercial documents.

# Distribution

JTI - Japan Tobacco International is the international tobacco division of Japan Tobacco, a leading international tobacco product manufacturer. The company is headquartered in Geneva and markets three of the five leading cigarette brands in the world: Winston, Mild Seven and Camel.

## Overview

JTI selected Soft1 ERP for the implementation of a system that achieves the consolidation of business processes and operational activities related to company associates in the Greek market. Utilizing a broad range of existing Soft1 modules (Sales & Distribution, Sales CRM, Soft1 Customization Tools, Business Intelligence) and taking advantage of the strong Soft1 capabilities as a development platform, JTI implemented a system that centrally manages all business information in a quick and efficient manner. Moreover, the company fully automated the data exchanging process, resulting in more reliable and accurate information. A set of business rules was established for data recording and management, so as to enable the full exploitation of system information from all involved parties. Also, the partners' ordering department was re-organized on the basis of a custom call-center solution that supports daily contacts with end-customers.
